FEATURES & BENEFITS

- This extra deep channel with trim is a deeper profile ideal for combatting spotting of individual LEDs. They allow a flush install into grooves or furniture pieces as well as prevent the much unwanted secondary refraction from reflective surfaces.
- These trim channels allow for a flush install into grooves or furniture pieces. They also work as a heat sink, which aids the LEDs lifespan as well as slowing down any brightness degradation over time.
- Suitable for both dry and damp locations.
- Available in bespoke lengths.
