DESCRIPTION

Our Circular Display Neon Flex offers full 360° illumination in an 25mm diameter, making it perfect for single use display lighting both indoors and outdoors.

Fully diffused PVC ensures “no shadow”, no spotting illumination for a durable, high quality lighting display.

LED Neon Flex is the revolutionary replacement of traditional Glass Neon and is perfect for display lighting

Neon Flex looks better than glass neon - and it opens all the environments where fragile Glass Neon cannot be used. As the name suggests, it is highly flexible. LED Neon Flex can be bent to a minimum radius of 6 cm, and can reach a maximum length of 5 metres
