Output	Max. 6A/Channel - 10A Total
Control Distance	30 Metres
Controller Dimensions	138mm x 56mm x 38mm
Receiver Dimensions	85mm x 45mm x 22.5mm
Warranty	1 Year

## SETUP GUIDE

Step 1.) Connect your LED strip light to the receiver unit by matching the connections to the markings on the unit. R = red / G = green / B = blue / WW = Warm White / CW = Cool White / + = positive wire

Step 2.) Connect your power supply to the receiver unit with the power off.

Step 3.) Insert sufficient batteries into the handheld controller.

Step 4.) Turn the power on to the transformer, then within 3 seconds press any of the zone keys on your controller.

Your LED lights should flash to signal a successful pairing with that zone.
